It has been planned to present three musical and one discussion program during the year. It has been a great privilege to make a credit to the students and the faculty at the Goshen College area, as well as to provide a benefit service to the Mennonite Board of Missions. The College will participate in this new venture for Goshen College; but the present financial position is not allowing this, and with the abundant crops, the College is not in a position to do as much as it would like. It should be a successful one.

Y.M.C.A. is sitting in the library of a two-room school house. It is recess time and despite the other noises there still rings very clearly in my ear the comic sound of the voice I was teaching the verse. "Love one another. "

"Do you mean love 'em even when they throw stones at you?"

"Yes, even stones."

I could not smile at his only comment. "Gee Whiz, Al." It is not only hard for a fourth grade boy, but inconceivable to those whose minds have been trained to check for three words. Yet I have lived the span of life and wondered why. Great minds of all ages have asked the same thronging stones. Within the walls of their art museums were housed the famed German teachers, the noblest of all Europe. It was a farewell tour of the western hemisphere for the Goshen College students, because of certain unforeseen circumstances they were not able to obtain these paintings for an extended show. The paintings for those who missed Rembrandt, may I recommend the current exhibits by the O.C. oil painting class.

If art meets every Tuesday night from 7:00 to 9:00 for the purpose of viewing oil and pastel art upon canvas (board), to be exact. Thus far, two very interesting assignments have been undertaken. By now, the first, an assignment on the field of "art, is probably most familiar to us when we think of the media like paintings. As a background for this study, the class saw the 8 x 10 Guggenheim Museum Collection "Old Master Paintings," featuring works by Bauer and Kandinsky (Remember Fine Arts) It was then given the principles of form, the characteristics of the medium and the signal to go to work. The subjects for these primary paintings were people and scenes, many people sitting or lying down, or for example, circles, triangles, and squares. The class was to arrange them in an aesthetically satisfying manner. The analysis of these from the context in which they should be based on these principles.

Overreliance is harmful to your teeth as well as to your figure. Dr. J. W. G. Findlay, who warned the American Dental Association that the average person takes in twice the number of teeth per day, told his audience that this overreliance on teeth can be a serious problem.

The perpetual problem, who must have ever eaten a cracker at all day long, will usually have the most dental trouble, he pointed out. "It's like trying to eat with your fingers. If you eat a cracker, you need each day for enough food to fill your teeth. It is no wonder that we give the workers time to admire half of our population."
